

Sector training overview

Manufacturing

In addition to the comprehensive employment support and coaching interventions we provide to all candidates on our programme, we also deliver in-depth, sector-specific training on their existing or a new industry.

This training comprises of a 10-minute insight video followed by a 40-48 page interactive workbook. The workbooks are divided into eight topics covering relevant information for anyone wanting to work in this sector. After each topic is completed, the candidate needs to complete a 'knowledge check' to ensure they've understood the key learnings.

Once the workbook is complete, the candidate will develop an action plan and set goals to support their journey to secure work within that sector.

Employment support and coaching

10-minute sector insight video

40-48 page sector workbook

Complete action plan and set goals

Topic 1 - Introduction to Manufacturing

In this section, we provide an overview of the manufacturing sector and the different areas candidates can enter. The workbook also explores the legislation and standards that underpin the manufacturing industry.

Topic 2 - Job roles and a career in Manufacturing

We explore the different types of roles available in manufacturing including food production and packaging facilities, pharmaceutical production facilities, and plants that manufacture parts of a larger product.

Topic 3 - Knowledge, skills and attitudes for Manufacturing

This section is designed to prepare a candidate for the skills required to work in the sector. We outline the importance of attention to detail, good manual dexterity, ability to work at pace and give detailed explanations of the expected behaviours for the sector.

Topic 4 - Communication skills

We outline the communication skills required for working in manufacturing and explain the different types of communication styles. The workbook also explores other methods of communication and details the benefits of active listening.

Topic 5 - Transferable skills

This section is particularly useful for candidates who are looking to upskill and become work-ready for a new sector. We explain the concept of transferable skills and how they can be identified and applied to a new workplace setting or sector.

Topic 6 - Equality and diversity

In this topic we explain the Equality Act 2010 and the guiding principles within it, including: what the act is there to do, what pieces of legislation are covered and the nine protected characteristics. The workbook also explains the difference between equality and diversity and provides a summary on safeguarding.

Topic 7 - Health and Safety

We provide an overview of health and safety requirements in the manufacturing sector, including the Health and Safety at Work Act 1974. The workbook highlights other health and safety considerations when working in manufacturing. We explain what risk assessments are and how they are conducted in the manufacturing sector.

Topic 8 - Employability skills

We focus on what employers in the manufacturing sector are looking for when recruiting individuals. This section is designed to help candidates best position themselves for a role in manufacturing. The workbook also lists useful adjective words that highlight strengths and interpersonal skills for the sector. This will help a candidate with their CV preparation. Finally, we explain the purpose of a company's mission, vision and values – what they entail and what they mean to an employee. This section concludes by detailing the mandatory requirements to work in manufacturing such as ID documents and Right to Work evidence through to DBS checks.

Action Plan

Once the learning section of the workbook is complete, the candidate is required to develop an action plan that details what they have learned and set goals to support their career in to manufacturing.

Glossary of terms

A glossary of terms can be found at the back of the workbook which lists key words used in the manufacturing sector and can be referred to at any time.
